Acknowledgements: Beginning in 2015, the Department of Health and Human Services entered into a contract with the New Hampshire Hospital Association (NHHA). NHHA was responsible for the data collection, validation and aggregation, with the assistance of our sub-contractor, the Connecticut Hospital Association. In light of these changes, 2015 will be considered a baseline and building block for future analysis.

A quality check of the data revealed the following caveats which should be considered before conclusions are drawn from this report.

1. Hospital billing/reporting system change

Some hospitals experienced a billing/reporting system transition during 2015 data submission. For these hospitals, discharge volumes, especially for outpatients, may have inconsistency cross months or quarters.
