

Your Endorsed Business Partner with 60+ years of Innovation

Spacelabs Healthcare is a global manufacturer and distributor of patient monitoring solutions, connected care informatics, diagnostic cardiology, and supplies and accessories for use in hospitals, medical clinics and physician offices.

Patient monitoring solutions are available for every care area of the hospital including complex telemetry and eICU environments that provide centralized monitoring of multiple facilities across wide geographical locations.

Your Mission is Our Vision

We are inspired by NHA's mission to deliver compassionate, accessible, high quality, financially sustainable health care to the patients and communities you serve. Our vision, "To advance care team performance by presenting a clear picture of the patient's condition while seamlessly engaging the entire care team around the patient" is an integral part in achieving those aims.

Partnership in Action

As an NHA member, you have access to valuable benefits from Spacelabs Healthcare.

Quarterly Webinars

We bring you quarterly webinars, at no charge, featuring industry leaders experienced in the important topics that impact everyday care.

Onsite Assessments

We offer NHA members onsite clinical and technical workflow assessments, and custom tools for hospitals interested in updating their monitoring solutions in the future.

Spacelabs consultants are your trusted resource to help meet future trends and demands in patient monitoring and connectivity from a clinical, technical, and financial perspective.

Corporate and Manufacturing

- Snoqualmie, WA near Seattle
- Parent Company: OSI Systems

60+ years of Innovation

- beginning with NASA Gemini and Apollo Missions
- Physiological Patient Monitoring
- Diagnostic Cardiology
- Supplies and Accessories

Nationwide Team

- Clinical Specialists, Technology Specialists, Service Engineers, Account Executives

The Spacelabs Advantage

- Workflow standardization and improved throughput
- Clinical collaboration to optimize care team performance
- Right patient, right device, every time
- Effective alarm management for a quieter, safer environment

Planning for the Future

Patient monitoring solutions today impact almost every aspect of patient care, but they are usually purchased only once every 10-15 years. Imagine using your cell phone purchased in 2005! It's just a different level of technology.

When planning for the future of patient monitoring and connectivity, considerations for future workflow and use cases need to be at the fore-front of informed decision making.

Spacelabs team of industry leading clinical and technical consultants will partner with NHA hospitals to define your vision to meet the Quadruple Aim. Our goals are aligned to achieve the best balance of clinical, technical, and financial needs to reach Value-Based Care.

Bringing Level 1 Care to NHA's Rural and Critical Access Hospitals

Spacelabs connectivity solutions enable rural and critical access hospitals to drive clinical efficiencies, maximize patient throughput, and maintain the same patient care as a Level 1 hospital by providing seamless connectivity solutions.
